

## Bonus Chapter 2

# How to get RM112 in a day (True Story)

This chapter is dedicated to all of you who have the passion to get started and involved in stock trading. In this chapter, I shall describe how to profits at least RM100 in a single trading day.

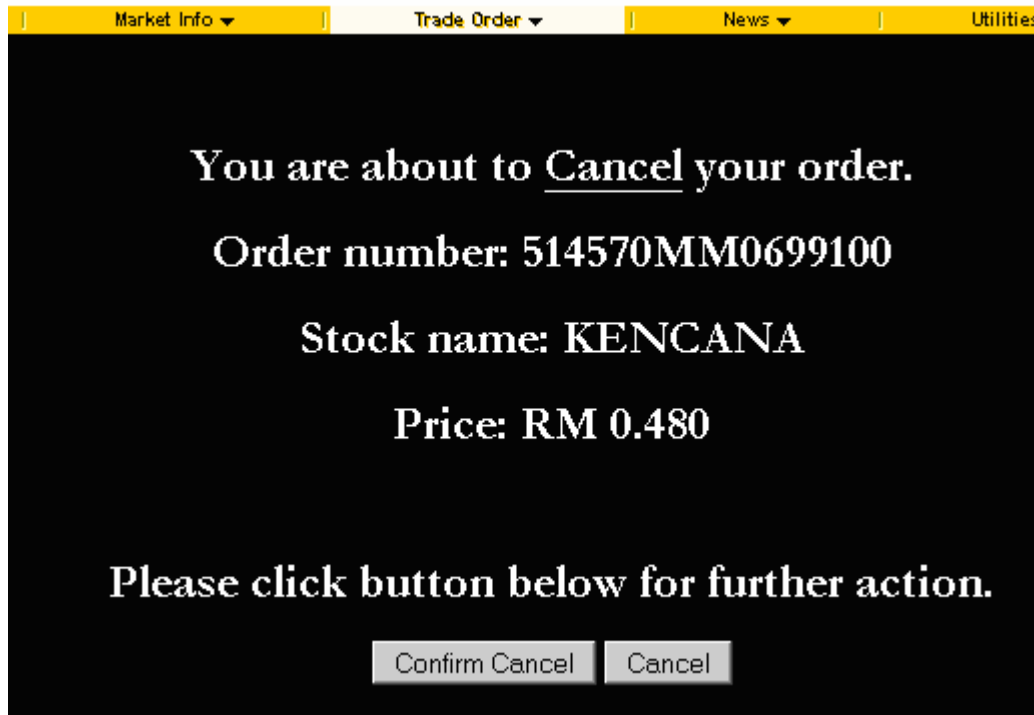

The story begins like this. It was Friday (15 December 2006); and first day for KENCANA (*stock code: 5122*) to get listed on Bursa Malaysia main board. KENCANA IPO price was 0.41 sen. After some discussion, reviews, reading and based on my own opinions and judgment, I guessed that the opening price for KENCANA would be above 0.45 sen and below 0.50 sen. My trading buddy, David, told me that Kenanga predicted the opening price for KENCANA would be around 80 sen. What? 80 sen? Too expensive! Nobody wants to buy KENCANA at that price.

Early in the morning, around 3 am Riyadh time, I send 2 Buy orders as shown below. Yes, you can send order (buy or sell) while the stock market is closed. After I have confirmed the order was in queue, I played the PS2. ☺ Yes, you may do stock trading any where in the world as long as you're connected to fast and reliable internet connection.

No.	B/S	Order No.	Stock Name	Order Price	Status	Order Qty	Match Qty	Reduce By (Unit)	Cancel / Reduce
1	B	514570MM0699100	KENCANA	0.480	SC	5000	0	<input type="text"/>	Cancel <input type="button" value="Send 1"/>
2	B	514570MM0699101	KENCANA	0.490	SC	7500	0	<input type="text"/>	Cancel <input type="button" value="Send 2"/>

For your information, first day debut in stock market is like bonus day for stock traders—a lot profits for each and every one of us. Sound good? Read further.

At 9.01 am Malaysia time, my friend (Wynn) told me that the opening price of KENCANA was 0.80 sen. *Alamak!* (Sometimes, we do make wrong decision. Life goes on.) Without delay, I send Cancel order as shown below.

My friend told me that KENCANA price sky-rocketed and within 1 minute, the stock price went up and now traded above 0.90 sen. Straightaway at 9:03am I send Buy order as shown below.

Since I am prepared with my own money (funds) to buy KENCANA stocks, I select CUP as payment type as shown below:

Without any delay, I send Cancel order to raise my cash.

The screenshot shows a trading platform interface with a yellow header bar containing 'market info', 'trade order', 'news', and 'quotes'. The main content area has a black background with white text. It displays the following information:

- You are about to Cancel your order.**
- Order number: 514570MM0699107**
- Stock name: KENCANA**
- Price: RM 0.975**
- Please click button below for further action.**

At the bottom, there are two buttons: 'Confirm Cancel' and 'Cancel'.

Tick! Tock! Tick! Tock! At 3:41pm, still no luck. I went to shop to buy Pepsi.

**\*\* Note:**

Whoah! As you may aware and notice while reading this chapter, almost all the things I taught you are embedded in this one chapter alone! Hahahahahaha...

As you may read and re-read this chapter, I suggest you to analyze the steps taken - to avoid mistakes I have made; and to double or even triple the profits I have made that day.

As many of you might say that **RM112.44** profits is not enough for one day trading. For me, it is enough as I do stock trading not for a living but for fun! I work as Software Engineer and my hobby is stock trading! ☺

Sometimes, I do get lucky and hit bigger profits. Sometimes, I lose too. That's normal.
